

Product Specifications

AllDown® Herbicide RTU (Ready to Use)

Non-selective Weed & Grass Herbicide

Description:

AllDown® Herbicide RTU is a weed and grass herbicide that is a breakthrough in environmentally responsible vegetation management. AllDown® is made of a special blend of synergistic components that will dehydrate un-wanted top growth foliage. AllDown® contains no harsh chemicals. Within less than an hour you will notice wilting of plants caused by desiccation. In some cases a repeat application may be required to perennial weeds. Weed management is an important component of cultural practices in agriculture. Weeds compete with crops affecting their yield and quality.

Uses:

- In vegetable gardens and flowerbeds
- Along fence lines and foundations
- Around trees and shrubs
- On patios, driveways and sidewalks
- Safe to use around waterways, ponds, and lakes

Benefits of AllDown:

- AllDown is EPA registered, No. 84069-2
- Will not persist and buildup harmful soil residues
- Organic. Non-GMO ingredients

Application Instructions:

- Apply when skies are mostly sunny and no rainfall or irrigation is predicted within 8 hours of application.
- Apply when the air is calm and temperatures are between 65° and 90° F.
- Take care to avoid overspray onto desirable plants. Thoroughly wet leaves of weeds to saturate. Apply only to areas that you want to knockdown, taking care to cover desirable plants with cardboard or plastic. If sprayed on desirable plants by accident, rinse off with water immediately.

Guaranteed Product Analysis:

Active Ingredients:

Citric acid	5.0%
Garlic.....	0.2%
Other Ingredients: vinegar, water.....	94.8 %
	100%

The active ingredients in AllDown are exempt from the requirements of Federal Insecticide, Fungicide and Rodenticide Act.
